

Hyp data documentation

This file is hypothetical data from 100 students in a continuing medical education course taught in two different ways.

The variables are:

SUBJECT	A unique identifier for each subject
SATIS	Satisfaction with the course, on a 100 point scale
MIDTERM	Score on a midterm examination, out of 100
FINAL	Score on the final examination, out of 100
SPATIAL	A measure of each student's spatial perception ability, out of 100
YEARS	Number of years since the student's MD was received
CASEBASE	Was the course case-based or didactic lecture? 1 = case-based, 0 = lecture
